

Our offer

- Strengthen national statistics institutes and systems by building capacities and work methods for collection, production and analysis of updated, relevant and quality data
- Support the harmonisation of statistical data with European and international standards to improve coherence and comparability, and foster data exchange between partners
- Improve and promote the dissemination of quality data available for increased use by governments, authorities, the private sector, media, researchers and students, civil society and citizens

Our know-how

- Experience sharing and know-how transfer through the dissemination of good practice during technical assistance missions, study visits, and workshops and training courses
- Establishment of practitioner and partner networks and fostering of South-South cooperation
- Regional cooperation project management within the framework of economic and political integration processes
- Operational, contractual and financial management of large cooperation projects; national, regional and international events organisation

Nos atouts

- A large network of public and private economy and statistics experts, with the best capacities and proven professional practices
- Innovating solutions and tools to respond to the various issues associated with statistics
- Appreciated and proven experience of a public international technical cooperation agency with donors and partner authorities
